Air Technology Engines Announced New Capabilities in 2009

(Naples, FL – November 16, 2009) Air Technology Engines, Inc. is pleased to announce that it added and expanded its helicopter services this past year. The new capabilities to overhaul major components for the Bell 206A/B series and Bell 206L series helicopters included the main transmission, main rotor hub assembly, swash plate and support assembly, tail rotor gear box assemblies and M/R mast assemblies.

Mike Turner, President and CEO of the Air Technology Engines said, “We were very excited to have expanded these services. We work for the customer and are always looking to expand our capabilities to provide new solutions.”

Air Technology Engines Inc., part of the Air Technology Group, repairs and overhauls gas turbine engines and provides technical support for engines used primarily in military, firefighter, civilian and law enforcement helicopters. Air Technology Engine, Inc. is an FAA and JAA Certified Repair Station.

The company’s other capabilities include overhauls and upgrades of gas turbine engines, in addition to overhauls of helicopter transmissions and dynamic components for helicopters used in firefighter, armed forces and law enforcement helicopters. Engine models supported include all series of the T53 engine, the Rolls Royce 250C20/T63 engine, transmissions and major components for the UH1H, AH1, 205, 212, 206 and OH58. Air Technology Engines offers parts options and customer solutions on repairs. Air Technology Engines is certified by the FAA, EASA and ISO9001:2000. The company provides specialized parts repairs and stocks over 20,000 line item parts for these helicopters.

Air Technology Inc., a separate corporation and sister company, specializes in providing helicopter and engine spare parts and accessories to customers throughout the world.

Air Technology Group can be found at the Dubai Airshow in the Florida Pavillion. For more information about products and services call 239-643-0011, 800-493-0011 or visit online at www.airtechnology.com
