**Air Technology Engines to Exhibit at
2013 Army Aviation Association of America Exposition**

(Naples, FL – April 7, 2013) Air Technology Engines of Naples, Florida, a Honeywell T53 Service Center specializing in T53 helicopter engine overhaul and precision repairs, will be heading to Fort Worth, Texas to exhibit at the 2013 Army Aviation Association of America (AAAA) annual professional forum and exposition to be held April 10-13 at the Fort Worth Convention Center.

Mike Turner, President of the Air Technology Group, and his staff have supported the military services for nearly four decades with parts, repairs as well as engine and component overhauls.

The forum and exposition will be a chance to share about Air Technology Engine's recent expansion and increased size of their facility, number of new hires, additional equipment and expanded manufacturing services offered.

“We are excited about our continued support of the military services,” says Turner. “We know the forum will be beneficial and informative to everyone who attends.”

Air Technology Engines repairs all models of the T53 engine, as well as main transmissions and major components for all Huey models, 205, 212, 206, OH58 and AH1 helicopters.

“Helicopter engine maintenance is vital to the operator. We deliver cooler running engines that are more reliable and have a lower cost of ownership,” explained Turner.

Air Technology Group has a world-class reputation for providing fast, efficient services to its clients. For more information about products and services, call 239-643-0011, 800-493-0011 or visit www.airtechnology.com online.
