Air Technology Engines to Attend Dubai Airshow 2011

(Naples, FL – October 19, 2011) Air Technology Engines will participate in the Dubai Airshow in the United Arab Emirates again this year. The show, which is the foremost aerospace event in the Middle East, will run from November 13th through the 17th.

Now in its 22nd year, the show is firmly established as a key event on the international aerospace calendar - consistently delivering key buyers and decision makers along with unrivalled access to the Middle East aerospace market. According to Airshow stats, the 2009 event drew 52,978 trade visitors from around the world along with 890 exhibitors from 47 countries and 1,389 international and regional media.

The Dubai Airshow is a biennial event and is projected to be even bigger than the 2009 show with more visitors and exhibitors. The five day show is expecting 55,000 trade visitors alone.

Alison Weller, Managing Director of F&E Aerospace (industry's event sector), was addressing a press briefing on the Airshow, and explained that the main objective of the Dubai Airshow is to provide a platform for exhibitors to network with the aerospace industry and market in the Middle East.

“We look forward to returning to the Dubai Airshow again this year,” said Mike Turner, President and CEO of Air Technology Engines. “We always welcome the opportunity to network and partner with Enterprise Florida who will, again, be exhibiting in the Florida Pavilion. We feel this is a great avenue to meet and talk with existing and prospective clients, as well as, have a chance to first-hand explain the

many benefits our company has to offer the industry. With over 35 years of helicopter experience, we have a lot to offer... expertise, integrity and solutions.”

The Florida Pavilion, which has been coordinated and orchestrated by Enterprise Florida, will be made up of 12 Florida companies. This joint effort to showcase Florida’s capabilities will include diversified companies in the aviation, aerospace and defense industries.

About Air Technology Engines

The company overhauls and upgrades gas turbine engines, helicopter transmissions and dynamic components used in firefighting, armed forces and law enforcement helicopters. The company specializes in providing maintenance for all models of the T53 engine, main transmissions and major components for the Huey UH1H, 205, 212, 206, OH58 and AH1 helicopters.
